

Percentage of Households with Children with Broadband Access

- ≤55%
- 56% - 65%
- 66% - 75%
- 76% - 85%
- >85%

Source: U.S. Census Bureau, American Community Survey, Public Use Microdata Areas

The full brief is available [here](#). For more information about PPA's work on education issues, please contact Daniel Quinn, Ph.D. at dquinn@publicpolicy.com or 313-303-8445.

Figure 2: Household Access to Broadband¹

¹ The data are compiled from mandatory reporting submitted by Internet Service Providers (ISPs) to the Federal Communications Commission (FCC). Compared to the U.S. Census Bureau American Community Survey Public Use Microdata Areas (PUMA) data reported in the issue brief, the FCC data show greater variation county-to-county. However, because the source is ISP self-reported data, there may be some degree of overestimation of the number of households served, along with other reporting errors.
